

Input Time-Series

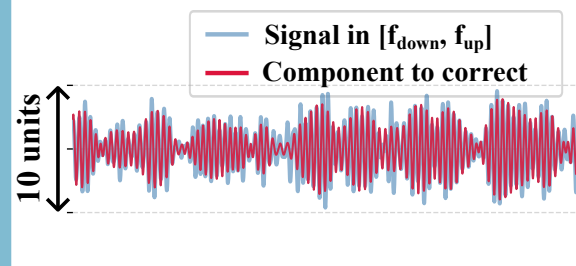

a) Expand Frequency Interval

b) Keep only frequency interval of interest

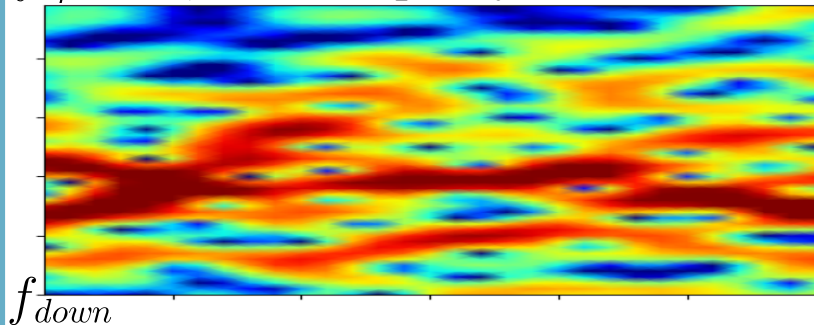

c) Filter signal within $[f_{down}, f_{up}]$

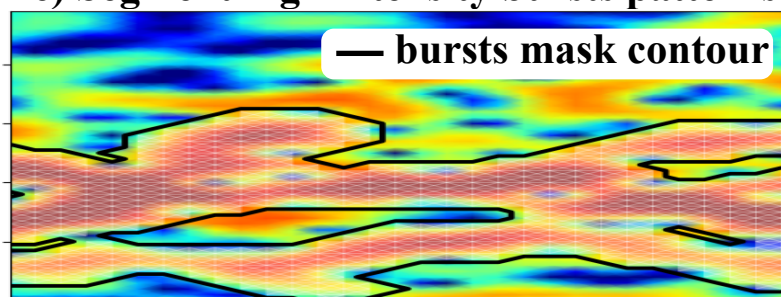

Φ_{TF}

d) Time-Frequency transform

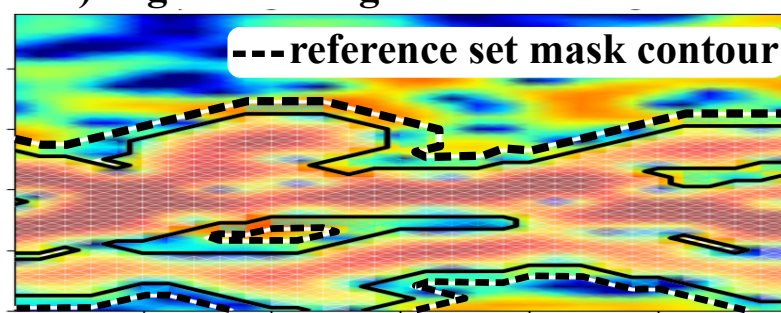

Φ_{seg}

e) Segment high intensity bursts patterns

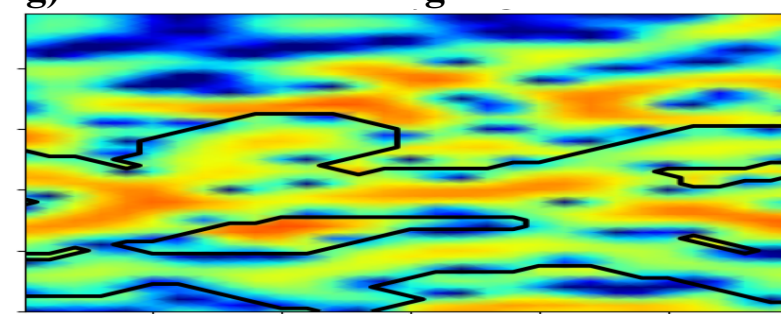

Φ_{ref}

f) Segment background reference set

Φ_{corr}

g) Correct bursts using reference set values

Φ_{TF}^{-1}

h) Inverse to get corrected signal
